

Homework 2:

Prepare a 20-30 slide presentation on the Log-Structured Merge tree and how it fits into a landscape of SSD and HDD storage architectures. Submit a pdf.

For this assignment, you need to read about 5 - 10 research papers. You will find that later papers distill the original idea and that survey papers are particularly interesting.

If you feel stymied, please talk to me. Learning how to survey a field is an acquired skill.
