Midterm 3 Prep 2

Use the previously created class University. We now model authors. An author has a Name, Title, Institution. For us, the only type of institution allowed is a University. As before, create dunder methods for repr and str.

Test with

_____

```python
if __name__=="__main__":
    u1 = uni.University("Marquette University", "Milwaukee", "WI")
    a1 = Author("Thomas Schwarz", "Dr.", u1)
    u2 = uni.University("Santa Clara University", "Santa Clara", "CA")
    a2 = Author("Ahmed 3mer", "Dr.", u2)

    print(repr(a1))
    print(a1)
    print(a2)
```

_____ Output is _____

```
Author: Name=Thomas Schwarz, Title=Dr.
Institution=University: Name=Marquette University, City=Milwaukee,
State=WI
Dr. Thomas Schwarz
Marquette University, Milwaukee, WI
Dr. Ahmed 3mer
Santa Clara University, Santa Clara, CA
```
