

## Module 13 Selftest

You are given a string such as “this is a string”. Use slicing in order to generate

- (1) The reverse list 'gnirts a si siht'
- (2) A string consisting of every other letter 'ti sasrn'
- (3) A string consisting of all letters but the first and the last.
- (4) A string consisting of all letters starting with the fourth and ending with the seventh letter.
